Databases	: Oracle, My SQL.
IDE's	: Eclipse IDE, Visual Studio Code, CodeSandbox
Platforms	: Windows, Linux
Tools	: Gitlab/Github
Additional skills	: Core Java, Linux basic commands

ACADEMIC PROFILE

- B.E in ISE(Information Science Engineering) from CMR Institute of Technology, Bangalore during 2014-2018 with an aggregate of 64.48%.

AWARDS & ACCOLADES

- Won Monthly Appreciation and Energy Bean Award for efficient and hardwork in the organization.
- Participated and represented CMR Institute of Technology in Inter-Collegiate Climate Science held at Indian Institute of Science, Bangalore.

PROFESSIONAL EXPERIENCE-CURRENT ORGANISATION

Harlalka Services India Pvt Ltd, Bangalore, India

08-06-2023 to Present

Front End Developer

PROFESSIONAL EXPERIENCE-PREVIOUS ORGANISATION

Huawei Technologies (India) Pvt Ltd, Bangalore, India

28-05-2020 to 24-03-2023

Assistant Engineer

Project Title : CTTs(Trouble Ticketing System for Alarms)

Client : AIS Thailand

Project Description:

CTTS is a Telecom project based on active alarms (alarm means issue from the device) from the network elements. Whenever any alarm comes from the network element, it needs to process the alarm and identify what kind of activity is based on the alarm detail conditions, then process through the trouble ticketing system and then notify the monitoring agents, etc.

Roles and Responsibilities:

- Involved in collecting the requirements from the Client.
- Collaborated with Management to understand the requirements and clarified the doubts.
- Worked for the user requirements and developed the software functional activities.
- Coded all the POJOs required for this system.
- Created all Functionalities using SOLID Principles and Unit Test Cases .
- Implemented the designing view pages using HTML and CSS.
- Also involved in coding of all Logging Activities using React Framework.
- Participated daily in Scrum meets to discuss different issues in the project.
- Coordinated with co-team members to develop high-level business and technical Document

Environment: ReactJs, OWS, Javascript, MySql, Linux and svn git.

Project Title : Away from the network

Client : AIS Thailand

Project Description:

AIS is a Thailand Telecom Company in Thailand. They provide telecom services all over Thailand. Away from the network is a project in the telecom domain that finds the subscribers who are away from the network signal and also which tells how long the subscriber is away from the network. Collecting signaling data from sources either in the form of files or streams. In this project, we need to accept the transactional data interested in and filter out the rest of the data. Using the timestamp of Detach transactions when the subscriber went out of network similarly we can use the timestamp of Attach transactions to know when the subscriber came back into the network. The results are written periodically to the database.

Roles and Responsibilities:

- Involved in collecting the requirements from the Client.
- Collaborated with Management to understand the requirements and clarified the doubts.
- Worked on the user requirements and developed the software functional activities.
- Coded all the POJOs required for this system.
- Created all Functionalities using SOLID Principles and Unit Test Cases .
- Implemented designing view pages using HTML and CSS.
- Also involved in coding all Logging Activities using React Framework.
- Participated daily in Scrum meets to discuss different issues in the project.
- Coordinated with co-team members to develop high-level business and technical Document
- Created users and groups using IAM and assessed individual policies for each group.
- Configure continuous integration for test automation execution on different environments using Jenkins.

Environment: Javascript, OWS, React, MySql, Linux and svn git.
